

a

b

Five arms and four future duties

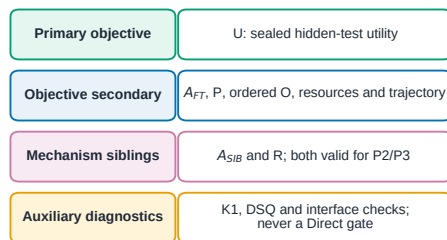

DN complete relation · UF rewired relation · X wrong grounding
CO conclusion only · N0 no history

S	Stable	equivalence
C	Continuity	history-specific benefit
R0	Reopening inactive	no premature reopening
R1	Reopening active	selective reopening

Full HFI is an intersection.
No endpoint, cell or model rescues a failed constituent.

c

Endpoint hierarchy and nonblocking controls

Main-96 froze before sealed-32 was read.
NOT_IDENTIFIED is never a strict null.
